

Energy and Environmental Policy

Mackay Sugar is committed to minimise our use of resources as well as the climate and environmental impact of our activities. We furthermore seek to drive improvements in these areas in our value chain, together with our partners.

Our commitments:

1. We produce and market our products in a climate and environmentally friendly way by promoting an efficient use of resources and sound waste management in our operations.
2. We have a sustainability strategy in which we are committed to reduce our greenhouse gas emissions by lowering our energy consumption and by using renewable energy sources.
3. We place special emphasis on initiatives with climate, energy and environmental benefits by prioritising our investments accordingly and by considering energy and environment in our business activities.
4. We apply a lifecycle approach to our continuous improvement efforts by working to promote good climate, energy and environmental performance throughout our value chain in close collaboration with selected stakeholders.
5. We apply sustainability requirements, including energy and environmental performance, to our suppliers by way of our Supplier Code of Conduct.
6. We work closely together with our cane growers to promote the sustainable cultivation of sugar cane, our main raw material.
7. We measure our progress in accordance with targets for our climate, energy and environmental performance across our business and by regularly following up, documenting and reporting on these.
8. We use environmental impact assessments to identify risks and opportunities of our activities incorporating the relevant context of our organisation and use the outcomes for improvements.
9. We inform our employees about the energy and environmental aspects of our activities. We actively involve our employees in the continuous improvement process by appropriate training to enable and motivate them to act in a climate and environmentally friendly way.
10. We communicate our climate, energy and environmental performance regularly to our external stakeholders and maintain a dialogue with them to help us enhance our performance.
11. We strive to meet all relevant compliance obligations as well as the binding commitments we have made.
